The U.S. CDC released more data today in their Vaccine Adverse Event Reporting System (VAERS), a [U.S. Government funded database](#) that tracks injuries and deaths caused by vaccines, and they added more than 2000 deaths following COVID-19 shots over what [they reported last week](#).

Last week they were reporting 6,985 deaths, and this week that number jumped up to 9,048.

This is by far the largest increase of recorded deaths in one week since they started reporting deaths following COVID-19 shots.

Tens of Thousands of COVID-19 "Vaccine" Injured in the U.S. Begging for Help as the Medical Community Turns Their Back on Them

23,941 Views

## Found 438,441 cases where Vaccine is COVID19

Table

↓	↑ ↓	
Event Outcome	Count	Percent
Death	9,048	2.06%
Permanent Disability	7,463	1.7%
Office Visit	80,268	18.31%
Emergency Room	56	0.01%
Emergency Doctor/Room	56,915	12.98%
Hospitalized	26,754	6.1%
Hospitalized, Prolonged	64	0.01%
Recovered	157,888	36.01%
Birth Defect	239	0.05%
Life Threatening	7,822	1.78%
Not Serious	174,230	39.74%
<b>TOTAL</b>	† 520,747	† 118.77%

† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 438441 (the number of cases found), and the Total Percentage is greater than 100.

Besides the 9,048 deaths, there are 7,463 permanent disabilities, 56,971 Emergency Room visits, 26,818 Hospitalizations, and 7,822 Life Threatening injuries following the COVID-19 injections.

And yet, none of this government data will be reported in any corporate media news broadcast, and those who try to post it on the Big Tech social media sites will be flagged for “fake news” by

public each week, and of course many deaths and injuries go unreported because the public is conditioned to believe that none of these deaths and injuries have anything to do with the COVID-19 shots.

To put this into perspective, there are now 30% more deaths recorded in 7 months since the launch of the COVID-19 shots in December of 2020, than during the **entire 31-year history of VAERS** recording deaths following vaccines since it started in 1990.

1990 to November 2020: 6,145 deaths following ALL VACCINES. ([Source.](#))

December 2020 to July 2, 2021: 9,048 deaths from COVID-19 shots only. ([Source.](#))

^

Last week we reported 622 deaths of unborn children when the pregnant mother received a COVID-19 injection. Using the same search parameters, that number increased to 803 cases this week. ([Source.](#))

However, deaths recorded in the age group of 12-15 have not really increased yet according to the data that the CDC is releasing, so I began to look at the deaths in the “unknown” age group to see if there were some there. I did find a couple, but what I also found was that there were other “symptoms” that the VAERS data uses that do NOT include the term “abortion” when reporting deaths of unborn children in pregnant mothers who took the shots.

So I noted those symptoms, such as “Foetal death, Premature baby death, Stillbirth,” etc., and the deaths increased from 803 to 917. ([Source.](#)) And it is very possible I am still missing some,

Of the 9,048 deaths the CDC recorded, 3,073 of those deaths are listed as age “unknown.”  
([Source.](#))

Trying a few different searches among this “unknown” age group, I did find a 13-year-old boy who died, and a curious entry of an 11-year-old girl who died and where the “family who got vaccinated died along with their dog due to have been being exposed to the members who got vaccinated.”

VAERS ID: [1440065](#) – **Write-up:** died three days after Covid vaccination; Autopsy showed enlarged heart and fluid surrounding the heart; Autopsy showed enlarged heart and fluid surrounding the heart; This is a spontaneous report from a contactable consumer or other non-health care professional in response to mail sent regarding the confirmation of below mentioned query. A 13-year-old male patient received second dose of bnt162b2 (PFIZER-BIONTECH COVID-19 mRNA VACCINE, Formulation: Solution for injection, Batch/Lot number and Expiration date not reported) via an unspecified route of administration in an unspecified anatomical location on an unspecified date as single dose for COVID-19 immunisation. The patient medical history and concomitant medications were not reported. The patient previously received first dose of bnt162b2 (PFIZER-BIONTECH COVID-19 mRNA VACCINE, Formulation: Solution for injection, Batch/Lot number and Expiration date not reported) via an unspecified route of administration in an unspecified anatomical location on an unspecified date as single dose for COVID-19 immunisation. On an unspecified date, the patient after receiving his second Covid vaccine from Pfizer died three days later. The patient underwent lab tests and procedures which included autopsy: enlarged heart and fluid surrounding the heart caused by the Covid vaccination. The outcome of the events was fatal. No follow-up attempts are possible; information about lot/batch number cannot be obtained.; Reported Cause(s) of Death: enlarged heart and fluid surrounding the heart.

spontaneous report from a contactable consumer. A 11-years-old patient of an unspecified gender received BNT162B2 (PFIZER-BIONTECH COVID-19 VACCINE), via an unspecified route of administration on an unspecified date (Batch/Lot number was not reported) as single dose for covid-19 immunisation. The patient medical history and concomitant medications were not reported. The reporter reported that 11 year old, pre-period, girls family who got vaccinated died along with their dog due to have been being exposed to the members who got vaccinated. The patient died on an unspecified date. It was not reported if an autopsy was performed. The lot/batch number has been requested; Reported Cause(s) of Death: Girl's family who got vaccinated died along with their dog due to have been being exposed to the members who got vaccinated.

18-year-old Camilla Canepa died in Italy following the AstraZeneca COVID-19 shot.

girl who died speaks out. I had never seen a brain reduced in those conditions by a thrombosis so extensive and so serious”.

On June 15th this year [we published the story](#) of Camilla Canepa, the 18-year-old Italian woman who developed blood clots and was dead two weeks after experimental AstraZeneca shot. The full story was originally published on [The COVID Blog](#).

Her death shocked the community where she lived so much, that a criminal investigation was started, and Italy changed its policy on the AstraZeneca COVID-19 shot limiting it to only people over the age of 60.

The neurosurgeon who operated on her brain has since spoken out, and English translations of what he stated have been circulating through the alternative media this week.

I found an [original source from Italy](#) that reported this, and here is the translation, courtesy of [DeepL](#).

The death of Camilla Canepa has shocked the whole of Italy, so much so that after the death of the 18-year-old girl from Sestri Levante as a result of thrombosis emerged a few days after the administration of the vaccine AstraZeneca the Ministry of Health has decided to ban the product against Covid to those under 60 years.

Waiting for the autopsy on the body of the young woman that will be carried out on Tuesday, to speak to La Stampa is Gianluigi Zona, director of the neurosurgical and neurotraumatology clinic of the San Martino Hospital in Genoa: “I had never seen a brain reduced in those conditions by a thrombosis so extensive and so serious”.

I can't judge what could have been picked up already in the first CT scan, it never arrived at San Martino. Normally, if there are no clues that lead to assume something serious is going on, no doctor in the emergency room prescribes a CT scan with contrast or other tests.”

The situation was immediately serious once the operation began: “All the venous sinuses were blocked by thrombi, a scenario that I had never seen in many years of this profession. You have to imagine the venous sinus as the river in the middle of a valley in which several streams converge.

If you build a dam in the middle of the river, the river swells and at that point the tributaries cannot discharge, with the result that the upstream pressure rises. In front of the picture I saw in the head of that girl, it is clear that – concludes the head physician – we are facing something not normal”. ([Source](#).)
