WESTERN DISTRICT OF WASHINGTON AT TACOMA
BY _____ DEPUTY

16-cv-5520 - RJB

NOTICE OF FINAL JUDGMENT

COMES NOW David Merrill of the VAN PELT family AM I. Redeemed

PENDRAGON. Title 12 USC §411 applies in all transactions.

"Perpetual inheritance" is settled by broadcasting genome in the Van Allen Belt through filter Bishop Castle by authority and record of CASTLE CHURCH - For the Redemption of the Office BISHOP. I am both Patroon (father) and MARIAMNE (Christopher WREN/mother) directly and confluence of two ancient Sumerian bloodlines. Proof of Service is attached.

By this authority 30-Day Judgment was initially entered on September 11, 2001. August 13, 2001 aligns with the Five Cube Sum Number Locks with 370 years passing since the Patent WREN-SAILER RENSSELAER, 1630 and 371 years passing from my "perpetual inheritance" 1629 completing with 153, John 21:11 right-brain hemisphericity and 407 years to find any prime quickly - as the Fast RSA Factoring Algorithm played a key role disassembling

Blockchain security and confidence building measures, allowing for Artificial Intuition in early 2028.

Additionally the United States has had plenty of time to settle the \$20M lien on the State of Colorado and agency. Default in silence.

Revelation 18:11 And the merchants of the earth shall weep and mourn over her; for no man buyeth their merchandise any more... Re 18:13 And cinnamon, and odours, and ointments, and frankincense, and wine, and oil, and fine flour, and wheat, and beasts, and sheep, and horses, and chariots, and slaves, and souls of men.

Ezekiel 27:12 Tarshish [was] thy merchant by reason of the multitude of all [kind of] riches; with silver, iron, tin, and lead, they traded in thy fairs... AV Ezk 27:13 Javan, Tubal, and Meshech, they [were] thy merchants: they traded the persons of men and vessels of brass in thy market.

Quoting from a Nebula Genomics article - *How does Whole Genomic Sequencing work?*

The answer is surprisingly simple. Imagine if you could read every sentence in 'War and Peace' at the same time and then just stitch all the sentences together in your head. It would take just a few seconds to read the entire novel!

Of course, we cannot read books this way, but scientists have developed technology to read DNA in such a highly parallel manner. That's exactly how Whole Genome Sequencing works. Millions of short stretches of DNA are decoded at the same time and then computationally stitched together.

And from the advertising:

Verified by Proof

It is even suggested that you can traffick your genome for a profit through Forbes! For instant purposes, focus on Blockchain as opposed to my antenna array in the Van Allen Belt.

Our Mission and Vision for the Future

Enabling Personal Genome Sequencing

Nebula Genomics' mission is to usher in the era of personal genomics by providing access to affordable and secure Whole Genome Sequencing. This is made possible by the contributions of Prof. George Church to the development of multiple DNA sequencing methods. In particular, molecular multiplexing approaches that enabled next-generation DNA sequencing (NGS) as well as long-read nanopore sequencing. Today, Nebula Genomics is turning these breakthrough technologies into products and making them available to people around the globe.

DISCUSSION AND CONCLUSIONS

The ability to use TVEMF to control the proliferative rate, directional attitude, and molecular genetic expression of normal human neural progenitor cells has been demonstrated. The procedure is applicable to, but not limited to, the control of NHNP cells in both two-dimensional and three-dimensional culture. As presented in the molecular genetic data shown in Tables 5 and 6, many of the genetic responses in both up-regulated and down-regulated genes are maturation and growth regulatory in nature. These genes are also primarily involved in the embryogenic process. Therefore it is reasonable to conclude that control over the embryogenic development process may be achieved via the presently demonstrated methodology.

Up-regulated sequences, Table 6, include:

1.8 Human endogenous retroviral protease mRNA, complete cds {Incyte PD:1347636}

The mRNA vaccine inventor Dr Robert Wallace MALONE makes reference in a recent interview with American Thought Leaders to a New England Journal article, *"Things like viral reactivation. And so this is the shingles, for instance. So, um, there was an attempt to, or the Paper attempts to make the case - Well, the vaccines have a lot of adverse events. But the disease has a lot of adverse events also, and it's worse. And, oh by the way there is a lot of overlap between these adverse events associated with the disease and the vaccine. But the messaging was focused in that manuscript that it was uh, it was far worse to get the disease than to have the adverse events associated with the vaccine. That's a little bit of a false analogy because the vaccine ostensibly be deployed to 80-90% of the population and you know, in terms of this wave of Delta we might see something like 20-30% of the population infected if we are lucky."*

It is important to note that Dr MALONE has transfected. And that he takes self-prescribed ivermectin for "long COVID". And so I presume he is suffering from the typical blood clotting.

There we connect up-regulating human retrovirus DNA by radio signal to stimulating activation of measles (shingles) and herpes etc. to exhaust the autoimmune system while massive amounts of mRNA as spike protein antigens line the inner walls of the circulatory system

activating platelets (blood clots) and adversely effecting and exhausting the many other magical miracles in blood for executing our autoimmune response.

As in the mRNA Inventor (MALONE) being now victim, the protein scaffolding lengths (Watson-Crick averaging) of inflaming human thrombin and leukocyte elastase activations, and their resonant frequencies are easily generated and broadcast as well. The kidneys can be easily shut down as well as enzymes critical in eliminating toxins. The Culling can be swift and merciful.

Addressing the NAV

Nucleic Acid *Vaccines* are gene therapy. They rewrite human DNA in transfection from the human story, altering both heritage and destiny for each victim. The new story (spike protein antigen) forms denial in the strongest sense - reformation of the basic belief set and knowledge structure, undermining wisdom. For to conquer the mind is to conquer the body and in the World War Z sense (Brad PITT movie) the victims move in unison manipulating social media, which includes mainstream news.

At the time 917 hits on VAERS (National Vaccine Information Center) tell the same heartbreaking story over and over:

Write-up: *I was 5.5 weeks pregnant when I revived the Pfizer Covid Vaccine. Everything was seemingly going fine with my pregnancy until about 4 hours after receiving the vaccine when I went to the bathroom and wiped and saw pink discharge on the toilet paper. I then began to have mild low abdominal cramping. The abdominal cramping and vaginal bleeding steadily increased in severity over the next 24 hours until I eventually had an obvious miscarriage the evening of 12/31/2020. I cant help but think the vaccine in some way caused my body to reject the pregnancy. Along with the miscarriage, I also had extreme tiredness with GI upset 12/31/20 - 1/02/2021.*

Write-up: *G3 P1 mother, estimated gestational age of baby = 4 weeks. On day 4 post-vaccine (1/11/21) started with heavy bleeding and labs confirmed miscarriage.*

Diagnostic Lab Data: *Test Name: tested for COVID-19; Result Unstructured Data: Test Result: Unknown results; Test Date: 20201228;*

Test Name: Nasal Swab; Test Result: Negative

CDC Split Type: *USPFIZER INC2021000238*

Write-up: *Miscarriage; patient was pregnant while taking BNT162B2; patient was pregnant while taking BNT162B2; This is a spontaneous report from a contactable Other Health Professional. A 34-year-old female patient received the first dose of BNT162B2(PFIZER-BIONTECH COVID-19 VACCINE, Batch/lot number: EL0140), intramuscularly on 22Dec2020 06:00 AM at single dose at Arm Right at Hospital for COVID. Medical history included ongoing sleep apnoea. There were no concomitant medications. There were no allergies to medications, food, or other products. The patient did not receive any other vaccines within 4 weeks prior to the COVID vaccine. The patient did not receive any other medications the patient received within 2 weeks of vaccination. Prior to vaccination, the patient was not diagnosed with COVID-19. The patient experienced miscarriage on 29Dec2020 13:00. The patient was pregnant while taking BNT162B2. The patient was 4 Weeks pregnant at the onset of the event. Patient last menstrual period date was 24Nov2020. The Pregnancy due to deliver was on 07Sep2021. The pregnancy resulted in spontaneous abortion. Since the vaccination, the patient has been tested for COVID-19 on an unknown date with unknown results. Nasal Swab on 28Dec2020 was Negative. There was no treatment received for the adverse event. The outcome of event was recovering.; Sender's Comments: The information currently provided is too limited to make a meaningful medical assessment hence, the events are conservatively assessed as related to the suspect drug BNT162B2 until further information becomes available. The impact of this report on the benefit/risk profile of the Pfizer product is evaluated as part of Pfizer procedures for safety evaluation, including the review and analysis of aggregate data for adverse events. Any safety concern identified as part of this review, as well as any appropriate action in response, will be promptly notified to agency, Ethics Committees, and Investigators, as appropriate.*

And this all comes as no surprise when women of childbearing potential (WOCBP) were carefully excluded from the Pfizer Phase I-III Safety Protocol, Page 39 about teratogenicity (causing birth defects - infertility/sterility) made it very clear.

The scientific rationale in the Protocol simply avoids datum about human reproduction while the Japanese rat study tracking lipid nanoparticles to determine the migration of the spike protein antigens throughout the body indicate that the ovaries are indeed the primary target. Effecting everybody however is the skeleton. The mesenchymal (yellow) bone cells magically create the stem cells sending them to construct and rebuild skin, tendons and other tissues and the hematopoietic (red) bone cells create erythrocytes and all the other wonderful cells that deliver distributed oxygen and nutrients, and foremost in this monolog compose the human immune system. Rewriting and reprogramming the bones with mRNA intended to assist only so far as the bronchial tubes and lungs is to say the least, unwise. Time will likely tell us that doing so is slam-dunk leukemia.

PF-07302048 (BNT162 RNA-Based COVID-19 Vaccines)
Protocol C4591001

vaccinated with study intervention produced by manufacturing “Process 1” will be selected for this descriptive analysis.

Participants are expected to participate for up to a maximum of approximately 26 months. The duration of study follow-up may be shorter among participants enrolled in Phase 1 dosing arms that are not evaluated in Phase 2/3.

4.2. Scientific Rationale for Study Design

Additional surveillance for COVID-19 will be conducted as part of the study, given the potential risk of disease enhancement. If a participant experiences symptoms, as detailed in Section 8.13, a COVID-19 illness and subsequent convalescent visit will occur. As part of these visits, samples (nasal [midturbinate] swab and blood) will be taken for antigen and antibody assessment as well as recording of COVID-19-related clinical and laboratory information (including local diagnosis).

Human reproductive safety data are not available for BNT162 RNA-based COVID-19 vaccines, but there is no suspicion of human teratogenicity based on the intended mechanism of action of the compound. Therefore, the use of a highly effective method of contraception is required (see Appendix 4).

4.3. Justification for Dose

Because of the requirement for a rapid response to the newly emerged COVID-19 pandemic, sufficient data were not available to experimentally validate the dose selection and initial starting dose. Therefore, the original planned starting dose of 10 µg (for both BNT162b1 and BNT162b2) in this study was based on nonclinical experience with the same RNAs encoding other viral antigens (such as influenza and HIV antigens). The general safety and effectiveness of uRNA and modRNA platforms have been demonstrated in oncological clinical trials with different administration routes (NCT02410733, NCT03871348). Doses of up to 400 µg total uRNA have been administered IV as RNA lipoplex (RNA-LPX) and doses of up to 1000 µg total naked modRNA have been administered intratumorally, both without signs of unpredictable overstimulation of the immune system.

Based on nonclinical data of the RNA components, with other liposomes or in conjunction with the lipid nanoparticles as will be tested clinically in this study, it was expected that doses in the 1- to 5-µg range would be immunogenic and induce neutralizing antibodies; however, it was anticipated that 3- to 10-fold higher doses would likely be required to elicit a stronger antibody response. Based on previous clinical and nonclinical experience, it was expected that doses of up to 100 µg would be well tolerated.

Update as part of protocol amendment 2: preliminary experience in this study and the BioNTech study conducted in Germany (BNT162-01) suggests that, for vaccine candidates based on the modRNA platform, a dose level between 30 µg and 100 µg warrants consideration. Therefore, a 50-µg dose level is formally included for BNT162b1 and BNT162b2.

For purposes of Culling (depopulation) in both short and long term executions, the ignorant, stupid and gullible are easily cleared weeds. The factor playing wild card is capture of individual belief sets, that even after feeling the effects one will venomously

press others to join the fatal inoculum. Fear inoculum was acquired by FAUCI mandating remdesivir for treating COVID-19 in American hospitals.

Pfizer released a Japanese study, data on rats tracing the lipid (fats) nanoparticles mRNA carrier of the spike protein antigens. The reliable method of tracing where the 30 trillion of the 40 trillion spike protein antigens in the syringe migrate throughout the body's circulatory system tell us what we would already suspect. The manufacturing centers using the fatty acids for fuel are the most attractive to the mRNA in the NAV. Namely the ovaries and bones.

A very concise description of adverse events, by attorney Lawrence BeCRAFT, is found in Docs 1 and 10 of USDC Northern Alabama Case #21-cv-702. However in his typical style BeCRAFT appears to be throwing the Case by utilizing Rule 41 instead of Rule 12 to dismiss one Count. Likely silence will dismiss all the Counts.

4. The Vaccines are unapproved, inadequately tested, experimental and dangerous biological agents that have the potential to cause substantially greater harm than the SARS-CoV-2 virus and the COVID-19 disease itself. According to data extracted from the Defendants' Vaccine Adverse Events Reporting System ("VAERS"), 99% of all deaths attributed to vaccines in the first quarter of 2021 are attributed to the COVID-19 Vaccines, and only 1% are attributed to all other vaccines. The number of vaccine deaths reported in the same period constitutes a 12,000% to 25,000% increase in vaccine deaths, year-on-year. The Vaccines appear to be linked to a range of profoundly

³ Issued December 18, 2020. See <https://www.fda.gov/emergency-preparedness-and-response/coronavirus->

It may have been a blunder using Rule 41 instead of Rule 12 but if not, then Larry is throwing the case. To sit quiet now will be inviting the judge to dismiss the entire cause without any further motion. Judge Corey L. MAZE encourages, even "invites" for Larry to salvage the cause, only dismissing one Count:

The Plaintiffs have filed a Notice of Voluntary Dismissal (doc. 21), in which they seek to "dismiss Count VII of the complaint" under Rule 41(a). But in Perry v. Schumacher Group of Louisiana., 891 F.3d 954 (11th Cir. 2018), the Eleventh Circuit held that Rule 41(a) is not an appropriate vehicle to dismiss a single claim without dismissing the entire lawsuit, id. at 958.

Time will tell.

The Governor of West Virginia, Jim JUSTICE is lamenting how the NAV is failing the "fully vaccinated". 26% rise in two weeks of COVID infections with a 25% rise in deaths over the same time. This reflects Anthony FAUCI mandating hospitals administer remdecivir (Veklury) to the first COVID-19 victims saying it was FDA approved when it was not, and upon the Ebola study in Africa, where remdecivir was

pulled from the study half way (6 months) for killing too many people. This in effect escalated the death toll for COVID so that people were panicked into accepting without question the experimental NAV inoculation in mass, without any recourse for all the adverse events.

Furthermore the FAUCI remdecivir debacle and JUSTICE alarm together reduce the Delta and all variants of COVID/SARS to buzzwords for adverse effects, from the NAV. The natural vaccine Doc 15 herein, ignored by the US Patent and Trademark Office anchors pre-patient Zero, applying ancient modalities of healing and disease prevention. It covers all mutations of COVID-19.

Declaration of the West India Company in favor of the Proprietors of
Rensselaers Wyck.

In the Name of God. Amen!

This day, the second of April, A^o XVI^e and seventy-four, before me, Henrie Outgers, by the Hon^{ble} Court of Holland admitted a Notary Public, resident in Amsterdam, and the undernamed witnesses, appeared Mr. Jacob Pergens, Hans Bontemantel and Nicolais van Beeck, Directors of the Incorporated West India Company at the Chamber in this city, appointed herein for the affairs of New Netherland, and by their associates, to what is hereinafter set forth, especially by resolution of the XXIX. March, XVI^e and seventy-four, empowered, making known and declaring: Whereas the Patroon and Co-Directors of Rensselaers Wyck, in New Netherland aforesaid, by virtue of the Patent dated the XIII. of August, XVI. thirty, were declared owners of the lands, buildings and plantations situate along the North river, more fully set forth in the Letters Patent; and, in consequence, Patroon and Masters of the hamlet, first called *de Fuyck*, afterwards *Beverswyck*, and now *Willemstadt*, whereabouts Fort Orange is built. And after the abovenamed hamlet, *Beverswyck*, was taken possession of by the Director of the abovenamed Company, Patroon Rensselaer and other Directors and Partners already, in the year XVI^e and fifty-two, and further from time to time

Notice that the Bill of Exchange went into effect exactly, to the day by virtue of the Patent dated August 13, 1630 and upon my cited 1629 "perpetual inheritance" upon the very same ground - the New York Stock Exchange and Twin Towers.

Also pay heed that among the copious evidence the three buildings were destroyed by intentional demolition is an independent video showing there were no airplanes colliding with the World Trade Center.

It is the exact same explosion, from a slightly different angle. No plane. The only people who saw the plane were watching special effects on TV.

The Report therefore is one big 567-page, *Wag the Dog and Pony Show*. Saddam HUSSEIN and Osama bin LADIN - Weapons of Mass Destruction and executing a man in his pajamas - well, it is difficult to tell now where the fiction ends and truth begins. Nothing can be fit into Rules of Evidence after this kind of farce.

THE 9/11
COMMISSION
REPORT

Final Report of the
National Commission on Terrorist
Attacks Upon the United States

AUTHORIZED EDITION

W.W. Norton & Company
New York London

The proposed National Counterterrorism Center should offer one-stop shopping in agencies with counterterrorism and homeland security responsibilities. That is, it should be an authoritative reference base on the transnational terrorist organizations: their people, goals, strategies, capabilities, networks of contacts and support, the context in which they operate, and their characteristic habits across the life cycle of operations—recruitment, reconnaissance, target selection, logistics, and so on. For example, this Center would offer an integrated depiction of groups like al Qaeda or Hizbollah worldwide, overseas, and in the United States.

The NCTC will not eliminate the need for the executive departments to have their own analytic units. But it would enable agency-based analytic units to concentrate on analysis that is tailored to their agency's special responsibilities.

A useful analogy is in military intelligence. There, the Defense Intelligence Agency and the service production agencies (like the Army's National Ground Intelligence Center) are the institutional memory and reference source for enemy order of battle, enemy organization, and enemy equipment. Yet the Joint Staff and all the theater commands still have their own J-2s. They draw on the information they need, copying and applying it to their operational needs. As they learn more from their tactical operations, they pass intelligence of enduring value back up in the Defense Intelligence Agency and the services so it can be evaluated, form part of the institutional memory, and help guide future collection.

In our proposal, that reservoir of institutional memory about terrorist organizations would function for the government as a whole, and would be the NCTC.

5. The head of the NCTC would thus help coordinate the operational side of these agencies, like the FBI's Counterterrorism Division. The intelligence side of those agencies, such as the FBI's Office of Intelligence, would be overseen by the National Intelligence Director as recommended later in this chapter.

6. The quotation goes on: "It includes eggs in intelligence, but also intelligence that, like a string of pearls, is so precious to wear, is too sensitive to give to those who need it, it includes the alarm that fails to work, but also the alarm that has gone off so often it has been disconnected. It includes the student who knows, but also the one who knows he'll be cleared out by his superior if he gets higher authority out of bed. It includes the contingencies that occur to no one, but also those that everyone assumes somebody else is taking care of. It includes intelligence/forecast procurement, but also decisions protected by several departments. It includes, in addition, the inability of individual human beings to rise to the occasion until they are sure it is the occasion—usually in a really too late. Finally, as at Pearl Harbor, surprises may include some measure of genuine novelty introduced by the enemy, and some other bad luck." Thomas Schelling, foreword to Roberts Wohlbacher, *Front-Header: Making and Deciding* (Stanford Univ. Press, 1992), p. viii.

7. For the Goldwater-Nichols Act, see Pub. L. No. 99-433, 100 Stat. 192 (1986). For a general discussion of the act, see Gordon Leshman, *Reorganizing the Joint Chiefs of Staff: The Goldwater-Nichols Act of 1986* (Greenwood, 1997); James Lecher, *History on the Ground: The Goldwater-Nichols Act Unleashes the Pentagon* (Texas A&M Univ. Press, 2003).

8. For a history of the DCI's authority over the intelligence community, see CIA report, Michael Warner ed., *Central Intelligence: Origins and Evolution* (CIA Center for the Study of Intelligence, 2001). For the Director's view of his community authorities, see DCI directive, "Director of Central Intelligence Directive 1/1: The Authorities and Responsibilities of the Director of Central Intelligence as Head of the U.S. Intelligence Community," Nov. 19, 1998.

9. As Norman Augustine, former chairman of Lockheed Martin Corporation, writes regarding power in the government: "As in business, cash is king. If you are not in charge of your budget, you are not king." Norman Augustine, *Managing D-Services in a High-Tech Age: A Systems' Guide to High-Level Management in Government* (Center for Strategic and International Studies, 2000), p. 20.

10. For the DCI and the secretary of defense, see 50 U.S.C. § 403-6(b). If the director does not consult with the secretary's chosen, then the secretary is required to notify the president of the director's nonconsultation. That is for the DCI and the secretary general, see 50 U.S.C. § 403-6(b)(5).

11. The new program would replace the existing National Foreign Intelligence Program.

12. Some smaller parts of the current intelligence community, such as the State Department's intelligence bureau and the Energy Department's intelligence entity, should not be funded out of the national intelligence program and should be the responsibility of their home departments.

13. The head of the NCTC should have the rank of a deputy national intelligence director, e.g., Executive Level II, but would have a different title.

14. If the organization of defense intelligence remains as it is now, the appropriate official would be the under secretary of defense for intelligence. If defense intelligence is transferred to create the responsibilities of the director of the DIA, then that person might be the appropriate official.

15. For the information technology architecture, see Ruth David interview (June 10, 2003). For the necessity of moving from need-to-know to need-to-share, see James Sternberg testimony (Oct. 14, 2003). The Director still has no authority for removing information-sharing barriers and—more than two years since 9/11—has only appointed a working group on the subject. George Janet prepared statement, Mar. 24, 2004, p. 37.

16. The intelligence community currently makes information shareable by creating "readline" reports, with the readable information at the top and then, below the "readline," the portions that recipients are told they can share. This proposal reverses that concept. All reports are created in readable form, with the readable information at the top and with added details accessible on a system that requires permissions or authentication.

17. See Markle Foundation Task Force report, *Creating a Trusted Information Network for Homeland Security* (Markle Foundation, 2003) (Markle Foundation Task Force report, *Protecting America's Freedom in the Information Age* (Markle Foundation, 2003) (both online at www.markle.org).

18. Markle Foundation Task Force report, *Creating a Trusted Information Network*, p. 12. The pressing need for such guidelines was also spotlighted by the Technology and Privacy Advisory Committee appointed by Secretary Rumsfeld to advise the Department of Defense on the privacy implications of its Terrorism Information Awareness Program. Technology and Privacy Advisory Committee report, *Safeguarding Privacy in the Fight Against Terrorism* (2004) (online at www.icasia.com/tpac/TAPAC_Report_Final_3-10-04.pdf). We take no position on the particular recommendations offered in that report, but it raises issues that pertain to the government as a whole—not just to the Department of Defense.

19. This change should eliminate the need in the Senate for the current procedure of sequential referral of the annual authorization bill for the national foreign intelligence program. In that process, the Senate Armed Services Committee reviews the bill passed by the Senate Select Committee on Intelligence before the bill is brought before the full Senate for consideration.

20. This recommendation, and measures to assist the Bureau in developing its intelligence code, are included in the report accompanying the Commerce, Justice and State Appropriations Act for Fiscal Year 2005, passed by the House of Representatives on July 7, 2004, H.R. Rep. No. 109-576, 109th Cong., 2d sess. (2004), p. 22.

21. Letter from Ridge and others to Collins and Levin, Apr. 13, 2004.

22. For the director's current capability, see Patrick Hughes interview (Apr. 2, 2004).

Since the mid-seventies the option to endorse has set the "floating" exchange rate for the US Dollar domestic/foreign. Public Law 94-564 and Senate Report Calendar #1081 Report #94-1148. Also Statement by Julius L. KATZ, State Department Bulletin November 17, 1975 Page 707. This has been based upon the New Deal of 1933 dropping any requirements for the private banker to become a member state bank.

Truly Title 12 USC §411 from §16 of the Federal Reserve Act is nothing more than a model for redeeming the mind. "They" in "They shall be redeemed in lawful money by demand at the Treasury of the United States..." could not be talking about Federal Reserve notes two sentences before. The pronoun can only apply to the living. People.

The SDR in Footnote 2 is best defined, "The measure of a social conditioning to blindly endorse the private credit of the local central bank." Upon this we find the new SDR is digital currency where it is now acceptable to sequence 100% of your DNA for a mere \$1,000 and resell it to confidence and security building measures, Blockchain, at a profit. The panic-driven Americans are now useless eaters with China, upon Hunter BIDEN's leaky planted drive revealing NOTICE that our security in FaceBook, Nextdoor, Avast, Norton etc. is now a Chinese feed through Russian Internet whispers swaying Presidential elections, saving to suitors' consulate, for the purpose of real time interactive geopolitical social engineering platform operations. Mining the Redeemed Mind in brain trust is the only remedy - always has been! William Jefferson CLINTON set things up nicely with his Reelection by accepting \$200M in Chinese campaign contributions for the Iridium Constellation installation contract plus a moratorium on American research on human fetal stem cells. This certainly put China in the lead, investing in over 20% of the national debt and now buying up the new infrastructure, while learning English to come over and manage it when the Culling is executed and mopped up.

U.S. Reserve Assets (3.12)
Millions of dollars, end of period

Assets	2012	2013	2014	Mar 2015	Dec 2015	Jan 2016	Feb 2016	Mar 2016	Apr 2016	May 2016
1 Total	150,175	144,575	130,090	116,640	117,581	117,108	117,218	119,727	121,035	119,190
2 Gold stock ¹	11,041	11,041	11,041	11,041	11,041	11,041	11,041	11,041	11,041	11,041
3 Special drawing rights ^{2,3}	55,090	55,184	51,941	49,202	49,688	49,500	49,532	50,518	50,821	50,305
4 Reserve position in International Monetary Fund ^{2,5}	34,161	30,750	25,164	18,179	17,609	17,561	16,366	16,577	16,713	16,661
5 Foreign Currencies ⁴	49,922	47,599	41,944	38,219	39,242	39,086	40,279	41,490	42,459	41,183

- Gold held "under easement" at Federal Reserve Banks for foreign and international accounts is not included in the gold stock of the United States; see table 3.13, line 3. Gold stock is valued at \$42.22 per fine troy ounce. [Return to table](#)
- Special drawing rights (SDRs) are valued according to a technique adopted by the International Monetary Fund (IMF) in July 1974. Values are based on a weighted average of exchange rates for the currencies of member countries. From July 1974 through December 1980, sixteen currencies were used; since January 1981, five currencies have been used. U.S. SDR holdings and reserve positions in the IMF have also been valued on this basis since July 1974. [Return to table](#)
- Includes allocations of SDR's in the Special Drawing Account in the International Monetary Fund, plus or minus transactions in SDR's. [Return to table](#)
- Includes holdings of Treasury and Federal Reserve System; consistent with the Quarterly Report on Treasury and Federal Reserve Foreign Exchange Operations, foreign currency denominated assets are shown not at market value but rather at amortized cost revalued at current foreign currency market exchange rates in order to report these assets in U.S. dollars. Excludes outstanding reciprocal currency swaps with foreign central banks. As of end-May 2016 there were \$501 million swaps outstanding. [Return to table](#)
- IMF data include the reserve tranche position and, as of May 2011, New Arrangements to Borrow. [Return to table](#)

Just the same, it is a logic jump to say the least, for people to sequence their genome only to sell it at a profit to a cybercurrency mine. Even if you can wrap your mind around it, risk management should reveal that the true resonant frequency or any harmonic of **Human endogenous retroviral protease** mentioned above, combined with

the eleventh harmonic upon Jacob's Ladder - a voltage multiplier - in a static field will exhaust the autoimmune system in any NAV victim. Doctor Robert Wallace MALONE exhibits a blood clot, thrombosis, under his right thumbnail in the recent interview.

Therefore the Judgment on 911 in 2001 has only been a warning of the COVID-19 Treasury Bubble well ready to burst. During the interview Dr MALONE admits to being on Ivermectin for "long COVID" and by his earlier paraphrased quote, "That the mRNA cleaves from the express cell should have been known long before it was injected into any humans."

Geometry

The Headstone is the NE Corner. I was born at Penrose Hospital PENDRAGON ROSE (marked Corpus Christi) on August 13, 1958.

This organization is in perfect Fibonacci symmetry. The Treasury vault on the SE Corner harbors the gold backing US notes still in circulation.

ber of shares into which the same is divided, the name and place of doing business of each bank executing such certificate, and of all banks which have subscribed to the capital stock of such Federal reserve bank and the number of shares subscribed by each, and the fact that the certificate is made to enable those banks executing same, and all banks which have subscribed or may thereafter subscribe to the capital stock of such Federal reserve bank, to avail themselves of the advantages of this Act.

Deposit of certificate.

The said organization certificate shall be acknowledged before a judge of some court of record or notary public; and shall be, together with the acknowledgment thereof, authenticated by the seal of such court, or notary, transmitted to the Comptroller of the Currency, who shall file, record and carefully preserve the same in his office.

Corporate powers.

Upon the filing of such certificate with the Comptroller of the Currency as aforesaid, the said Federal reserve bank shall become a body corporate and as such, and in the name designated in such organization certificate, shall have power—

General.

- First. To adopt and use a corporate seal.
- Second. To have succession for a period of twenty years from its organization unless it is sooner dissolved by an Act of Congress, or unless its franchise becomes forfeited by some violation of law.
- Third. To make contracts.
- Fourth. To sue and be sued, complain and defend, in any court of law or equity.
- Fifth. To appoint by its board of directors, such officers and employees as are not otherwise provided for in this Act, to define their

Succession of a twenty year period for the constructive trust.

In the Golden Rectangle we find the Union - where my parents married also designating the Headstone on the NE Corner. David Merrill of the VAN PELT family AM I. I AM THAT I AM.

Therefore final judgment is entered and on the record.

Certificate of Mailing;

My signature certifies that I have delivered this Original, and a copy to Rock Solid Process Servers, Melvin CAHOON for filing on September 10th, 2021. And for the

copy to be mailed to the Treasury of the United States at 1500 Pennsylvania Avenue NW,
in the city of Washington, District of Columbia - 20220.

eradication of SARS

"In the realm of ideas, of mental objects, those ideas whose properties are reproducible are called mathematical objects, and the study of mental objects with reproducible properties is called mathematics." *What is Mathematics, Really?* by Reuben Hersh; Oxford University Press 1997, p. 66.

An accurate description or genomic signature of a new event or condition like the contraction of Severe Acute Respiratory Syndrome (Corona Virus) or the West Nile Virus may be easily developed with a sensitive transducer and Digital Storage Oscilloscope like the RIGOL Corporation RVO 3100 50 MHz bandwidth, 100 MSa/sec portable device seen here:

Available Digital Storage Oscilloscope

	RVO3100	100M Sample Rate Digital Storage Oscilloscope + Spectrum Analyzer + Battery(Optional)
	RVO3050	50M Sample Rate Digital Storage Oscilloscope + Spectrum Analyzer + Battery(Optional)

On a notebook computer display, modulating the inherent 60 Hz noise (from the Western power distribution system) one finds the finer signal ready for viewing:
